About the Conference

Accomplishing sustainable urban development is a crucial challenge for cities in the twenty-first century. The green building assessment tools play a critical role in promoting green and sustainable practices. The assessment tools introduce mandatory prerequisites which in alignment with current industry trends, standards, and regulations. This conference aims to provide an opportunity for building professionals to explore global solutions for sustainable urban development, and to provide suggestions in response to the government's Energy Efficiency Labelling Scheme for buildings.

Highlights of the Conference

- Challenges and Benefits on Existing Assessment Tools
- Overseas Experience Sharing
- Challenges and Benefits on Existing Building Revamped Assessment Tool
