

# The Certified Energy Manager (CEM®) Program for Professional Certification (ON-LINE FAST TRACK <u>LOW COST</u> VERSION)

Date:	13, 14, 15, 18, 19 & 20 January 2016
Time:	8:00 pm to 10:00 pm (Hong Kong Time)
Exam:	30 January 2016, 9:00 am to 1:00 pm
Venue:	To be Advised

Course Code:CEM / 15 / HK (OL)Registration Deadline:11 December 2015

The Ass	ociation of Energy	Engineere
*	certifies that	
	Leonard K. Chow	-
	-1	4
has ce	mpleted the prescribed standards for ces	dificultion,
has demo	nstrated a high level of competence and	ethical fitness
for ener	gy management, and is hereby grante	d the title of
CEDI	IFIED ENERGY MAI	MACED
CERI		NAGER
	Expiration Date: December 31, 2012 CEM	
	11374	
13 25 0 E. A.		Helen adarier

### THE MARK OF AN ENERGY PROFESSIONAL

Since it's inception in 1981, the Certified Energy Manager (CEM®) credential has become widely accepted and used as a measure of professional accomplishment within the energy management field. It has gained industry-wide use as the standard for qualifying energy professionals both in the United States and worldwide. It is recognized by the U.S. Department of Energy, the Office of Federal Energy Management Programs (FEMP), and the U.S. Agency for International Development, as well as by numerous state energy offices, major utilities, corporations and energy service companies. By attaining the status of CEM, you will be joining an elite group of over 10,000 professionals serving industry, business and government throughout the U.S. and in 77 countries. In particular, the contexts of the latest mandatory Energy Audit Guidelines in Hong Kong will be included in the course.

# COMPREHENSIVE 6 EVENING ON-LINE TRAINING PROGRAM FOR ENERGY MANAGERS (prep: CEM Certification)

This is the CEM on-line course (same as the course held in USA). Metric units will be taught in Hong Kong instead of Imperial units in USA. CEM certificates will be issued directly from Association of Energy Engineers (USA Headquarters) after passing the exam with eligibility conditions of experience and qualifications. To obtain further information on the CEM program, please visit the web site <u>www.aeecenter.org/certification/cem</u>.

Cours	se Fee:		
A1:	Ordinary Applicant:	US \$1,220.00	(HK \$ 9,500)
A2:	Early Bird <sup>#</sup> :	US \$1,155.00	(HK \$ 9,000)
A3:	Pairing *:	US \$1,155.00	(HK \$ 9,000)
A4:	Early Bird + Pairing*:	US \$1,110.00	(HK \$ 8,600)
Exam	Fee:		
B1:	Exam – Taking this course	US \$ 360.00	(HK \$ 2,800)
B2:	Re-sit exam - Course taken previously:	US \$ 450.00	(HK \$ 3,500)

Note: # Early Bird: Registered before 14 November 2015 \* Pairing: 2 candidates or more to submit at the same time.

#### **ABOUT THE COURSE**

This special in-depth course is ideal for professionals who seek a more detailed program of instruction covering the technical, economic and regulatory aspects of effective energy management. The program provides detailed coverage of all of the 26 training sections specified for energy managers in the field, and offers a comprehensive learning and problem-solving forum for those who want a broader understanding of the latest energy cost reduction techniques and strategies. The course will be presented online in a series of teleconferencing modules. The candidates only need to put them on internet at home. No venue will be provided.

#### INSTRUCTORS

**CLINT D. CHRISTENSON,** C.E.M., is currently a consultant and instructor providing optimization services for industrial, commercial and institutional customers. He previously served as Senior Buildings Engineer for Pacific Northwest National Laboratories, Senior Energy Engineer with NORESCO, Inc., and the Director of Advanced Solutions for Johnson Controls, Inc. Clint served as the Director of Oklahoma State University's Industrial Assessment Center while pursuing a Ph.D. His broad experience in energy management has included the conducting of over 150 industrial, commercial, and institutional energy surveys over 20 years. He has published widely in the energy field, and made numerous presentations at national and international conferences.

#### **TECHNICAL REQUIREMENTS**

Each person will need a computer with internet access. A rehearsal session will be arranged to ensure successful connection to webinar before actual lecture.

#### **COURSE OUTLINE**

THE NEED FOR ENERGY MANAGEMENT	ENERGY CODES AND STANDARDS	INDOOR AIR QUALITY
<ul> <li>Building energy cost control</li> <li>Utility DSM programs and deregulation: energy efficiency and peak demand reduction</li> <li>Commercial business energy cost control</li> <li>Industrial plant operation improvement         <ul> <li>Reducing energy costs</li> <li>Reducing environmental emissions</li> <li>Improving product quality</li> <li>Improving plant productivity</li> </ul> </li> </ul>	<ul> <li>Building codes</li> <li>ASHRAE standards (62, 15, 3, 90.1)</li> <li>ASME, IEEE, and other standards</li> <li>Federal legislation: NECPA, PURPA, NGPA, CAAA, NEPA of 1992</li> <li>CFC replacements: Montreal Protocol, global climate change</li> <li>National Energy Policy Act of 1992</li> </ul>	<ul> <li>Standards of care: ASHRAE Standard 62</li> <li>Reasons for managing indoor air quality</li> <li>Acceptable air quality</li> <li>Ventilation rate procedure, Air quality procedure</li> <li>Typical air contaminants; VOCs and bioaerosols</li> <li>IAQ problems; CO2 measurement and control</li> <li>AEE Certified IAQ Professional requirements</li> </ul>

CONDUCTING AN ENERGY AUDIT	ELECTRIC RATE STRUCTURES	BOILERS AND STEAM GENERATION
<ul> <li>Purpose of the energy audit</li> <li>Facility description and data needs</li> <li>Major systems in the facility</li> <li>Data forms for recording information</li> <li>Collecting the actual data</li> <li>Identification of preliminary energy management opportunities</li> <li>Energy audit reports</li> </ul>	<ul> <li>Short history of electric rates</li> <li>The difference between power and energy</li> <li>Electric meters</li> <li>Components of electric rates</li> <li>Example rate structures</li> <li>Factors in controlling electric costs</li> <li>Electric utility incentive programs</li> <li>Special schedules (interruptible, TOU, real-time pricing)</li> </ul>	<ul> <li>Basics of combustion systems: excess air control</li> <li>Boiler efficiency improvement: blowdown management, condensate return, turbulators</li> <li>Combustion controls</li> <li>Waste heat recovery</li> <li>Steam traps: purpose and testing</li> <li>Process insulation</li> <li>Example of boiler improvement</li> </ul>
<ul> <li>ENERGY AUDIT INSTRUMENTATION</li> <li>The need for instrumentation</li> <li>Light level meters</li> <li>Electric meters: voltages, current, power, energy, power factor</li> <li>Temperature-measuring instruments</li> <li>Combustion efficiency measurement</li> <li>Air flow and air leak measurement</li> <li>Thermography</li> <li>Ultrasonic leak detectors</li> <li>Data logging</li> </ul>	<ul> <li>MOTORS AND ADJUSTABLE SPEED DRIVES</li> <li>How motors work</li> <li>High-efficiency motors</li> <li>Examples of cost-effective motor changes</li> <li>Use of adjustable speed drives</li> <li>Example of cost-effective ASD use</li> <li>Improved motor belts and drives</li> <li>Compressed air management</li> <li>Adjustable speed drive alternatives: eddy current clutches, variable frequency drives, inlet and outlet vane control, etc.</li> </ul>	<ul> <li>GREEN BUILDINGS</li> <li>Introduction to sustainability</li> <li>The USGBC and the LEED rating systems for new construction (NC) and existing building (EB)</li> <li>Summarization of the prerequisites and credits for LEED NC</li> <li>Summarization of the prerequisites and credits for LEED EB</li> <li>EPA ENERGY STAR Program and Portfolio Manager</li> <li>ASHRAE Green Guide</li> <li>Benefits to the community, owners, and occupants</li> </ul>
<ul> <li>ENERGY ACCOUNTING IN BUILDINGS AND FACILITIES</li> <li>Energy use index, energy cost index</li> <li>Where energy is used in facilities</li> <li>Lighting and HVAC energy use</li> <li>ENERGY RATE STRUCTURES</li> </ul>	<ul> <li>MANAGEMENT</li> <li>Peak load reduction</li> <li>Power factor improvement</li> <li>Energy management control systems</li> <li>Load management</li> <li>Harmonics and other power quality issues</li> </ul>	<ul> <li>LIFE CYCLE COSTING</li> <li>Concept of life cycle costing</li> <li>Purchase costs vs. operating costs</li> <li>Example analyses</li> <li>Government standards: FEMP</li> </ul> FUEL SUPPLY AND FUEL SWITCHING
<ul> <li>Identifying types of energy used</li> <li>Electric rates, gas rates</li> <li>Oil, coal, and other rates</li> <li>Steam and hot water rates</li> <li>Factors in controlling fuel costs</li> <li>Utility incentive programs</li> </ul> WASTE HEAT RECOVERY <ul> <li>Objectives: design criteria</li> <li>Types and maintenance of heat exchangers</li> <li>Recuperators; economizers</li> </ul>	<ul> <li>HVAC SYSTEM</li> <li>Types of HVAC systems and new technologies</li> <li>The vapor-compression cycle</li> <li>COPs and EERs</li> <li>Air conditioning loads</li> <li>Chiller improvement example</li> <li>Control, thermal storage, absorption systems</li> </ul>	<ul> <li>Alternative fuel choices</li> <li>Technology choices: HVAC systems, boilers, heaters, industrial processes</li> <li>Benefits of deregulation: electric and gas</li> <li>ALTERNATIVE FINANCING</li> <li>Different financing methods</li> <li>Attributes of each method</li> <li>After-tax cash flow analysis</li> </ul>

#### **Examination Requirement**

All CEM candidates must satisfactorily complete a **four-hour** written open-book exam which contains 130 multiple choice questions, proctored by an approved exam administrator. Of the following seventeen (16) sections of the exam, candidates must complete at a minimum of eleven, including those indicated as **Required**. Only the first 11 sections that are marked (by the student) will be scored by the exam grading system.

- 1. Energy Accounting and Economics Required
- 2. Energy Audits and Instrumentation Required
- 3. Electrical Systems
- 4. HVAC Systems
- 5. Motors and Drives
- 6. Industrial Systems
- 7. Building Envelope
- 8. Cogeneration and CHP Systems

- 9. Energy Procurement
- 10. Building Automation and Control Systems
- 11. Green Buildings, LEED & Energy Star
- 12. Thermal Energy Storage Systems
- 13. Lighting
- 14. Boiler and Steam Systems
- 15. Maintenance & Commissioning
- 16. Alternative Financing

#### Eligibility

The prerequisites to qualify for the certification process have been designed to take into account the possible diversity of education and practical experience an individual may have. However each CEM candidate must meet one of the following criteria with the pass of exam:

- An engineering degree and/or R.P.E. and/or P.E., with at least *three (3)* years experience in energy engineering or energy management.
- A science or business degree, with at least *five (5)* years experience in energy engineering or energy management.
- A two-year **technical diploma or certificate**, with *eight* **(8)** years experience in energy engineering or energy management.
- **Ten (10)** years or more **verified experience** in energy engineering or energy management. (Note: Letters of reference and verification of employment must be submitted.) Evidence of years of experience must be submitted for CEM status application after passing the exam. Application forms will be distributed the students after the course/exam for the CEM certification.

#### Conditions

- 1. All candidates should firstly fax the form for registration and issue cheque for final confirmation.
- 2. Every effort will keep the course date unchanged. However, all candidates will be informed well in advance should there be any change of course date and other reasons.
- 3. The course contents may subject to change in accordance with the instructor(s).
- 4. The organizer reserves the right to cancel the course should there be insufficient candidates or other reasons. Course fee will then be refunded 100%.
- 5. All exam passed candidates will enjoy 1-year free AEE membership and a CEM certificates if he/she fulfils the above criteria.
- 6. Exam date may subject to change with prior notice to students.

# < REPLY SLIP >

# The Certified Energy Manager (CEM®) Program for Professional Certification

Course Code: CEM / 15 / HK (OL)

## Registration

Early Bird Deadline: 11 December, 2015 Course Deadline: 14 November, 2015

#### (First come first served, application may early close if class size reaches 30)

To register, please complete the reply slip and fax it to (852) 3107 1388 or email to fiona.lok@cinotech.com.hk. Then either (1) mail it together with your crossed cheque made payable to: "**AEE Hong Kong Chapter Ltd.**" c/o

- Cinotech Consultants Limited, address to Rm. 1710 Technology Park, 18 On Lai Street, Shatin, N.T., Hong Kong. Attention: **Ms. Fiona Lok** (Tel: +852 2151 2083), e-mail: fiona.lok@cinotech.com.hk;
- Or (2) Bank payment: HSBC account no. 614-054229-838 write the candidate name on the bank-in slip and then email to Fiona for record.
- Note: (i) Do not accept payment in US\$. Only accept HK\$.
  - (ii) For oversea candidate, please use bank transfer method only. All bank handling charges to be borne by the candidate.
  - (iii) All candidates MUST settled the payment before the course. Otherwise, they cannot join the class and exam.
